Technical Skills

- **Programming Languages:** C++, Python (basic)
- **Web Technologies:** HTML, CSS, JavaScript (basic)
- **Core Concepts:** Data Structures and Algorithms, Operating Systems
- **Data & Tools:** Basic data interpretation, Excel, Git, LaTeX, VS Code

Education

Bachelor of Engineering in Computer Science Engineering

Expected 2028

Sant Longowal Institute of Engineering and Technology (SLIET)

CGPA: **9.97 / 10** (SGPA: Sem I – 10.0, Sem II – 9.95)

Class XII (CBSE)

CKC Academy

Score: 93.2%

Academic Project

CPU Scheduling Visual Simulator - GitHub-CPU SCHEDULING SIMULATOR —

HTML, CSS, JavaScript, Google Charts

- Designed and developed an interactive web-based simulator to demonstrate CPU scheduling algorithms including FCFS, SJF, SRTF, and Round Robin.
- Implemented dynamic Gantt chart visualizations to illustrate process execution flow and scheduling decisions.
- Programmatically calculated key performance metrics such as Completion Time, Waiting Time, and Turnaround Time for each process.
- Focused on clean UI design and usability to enhance conceptual understanding of Operating System scheduling mechanisms.

Practical Experience

Content Creation & Performance Analysis (Self-Initiated)

- Created and published 50+ short-form educational and informational videos across social media platforms.
- Tracked audience engagement metrics and iteratively refined content strategy based on performance insights.
- Developed discipline, consistency, and analytical thinking through independent content execution.

Video Editing Experience

- Edited 70+ videos involving structured sequencing, transitions, captions, and basic motion elements.
- Managed end-to-end editing workflow while adhering to timelines and quality standards.

Certifications & Ongoing Learning

- Certified in LaTeX for technical and academic documentation.
- Actively learning Python, Data Analytics fundamentals, and introductory Machine Learning concepts.
